Natural Gas STAR is a flexible, voluntary partnership that encourages oil and natural gas companies—both domestically and abroad—to adopt cost-effective technologies and practices that improve operational efficiency and reduce emissions of methane, a potent greenhouse gas and clean energy source. Working collaboratively with the oil and natural gas industry in the United States since 1993, Natural Gas STAR has provided a framework to encourage partner companies to implement methane emissions reducing technologies and practices and document their voluntary emission reduction activities.

Distribution Technology Transfer Workshop

This half-day workshop will be held in Orlando, FL and is jointly sponsored by Natural Gas STAR and the American Gas Association (AGA). This event will be held in conjunction with the AGA's Operations Conference and will focus on LDC operations and distribution systems. Participants will engage in a peer-based exchange of technical information on practices and technologies available to the industry. This workshop will include detailed information that participants can use to assess the feasibility of adopting these practices and technologies in their operations.

Workshop Information

Thursday, May 23, 2013
8:00 am – 11:30 am
Gaylord Palms Hotel
Palm Beach Conference Room
6000 W. Osceola Parkway
Kissimmee, FL 34746
(407) 586-2000

Presentation Topics

Natural Gas STAR Program:
Overview of the Natural Gas STAR Program and its technical resources.

Methane Emissions & Mitigation Technology in the Distribution Sector: Overview of Gas STAR distribution sector technologies and practices.

New Studies on Methane Emissions: Gas Technology Institute's (GTI) methodology and study results on emissions from plastic and cast iron pipes.

PG&E Experience with Advanced Detection Technology: Natural Gas STAR Partner PG&E's use of Picarro's technology to improve operations.

Methane Emission Mitigation - Other Partner Experiences:
Survey of various Gas Partner experiences.

A demonstration of Picarro's technology will follow the workshop.
